

HACKATHON PITCH DECK

SetuCredit

Democratizing Rural Credit via India's UPI

Voice-guided, consent-first alternative credit passports unlocking instant micro-loans for Bharat's next 500 million.

TEAM

SetuCredit Core Team

TRACK

Financial Inclusion & Digital Public Infrastructure (DPI)

VISION

Unlocking frictionless credit data trust just as UPI unlocked digital payments

2

The Ground Reality: Bharat's Credit Gap

The 'Data-Rich, Credit-Poor' Paradox in Tier 3/4 India

400M+

individuals excluded from formal credit

63M

MSMEs excluded from formal credit systems

₹3,000+

manual bank origination cost (CAC) per loan

36%-60%

APR paid to informal lenders

Mass Exclusion 400M+ individuals and 63M MSMEs are excluded from formal credit systems.

Rigid Underwriting Traditional models rely strictly on CIBIL, ITRs, and salary slips.

Siloed Data Non-financial data (land patta, electricity bills, dairy yields) sits in isolated silos.

High Origination CAC Manual bank origination costs exceeding ₹3,000 make micro-loans unprofitable.

Predatory Debt Unserved borrowers end up trapped paying 36%-60% APR to informal lenders.

3

The Solution: SetuCredit Architecture

A Consent-Driven Alternative Underwriting Engine

Vernacular & Voice-First Onboarding in 6 regional languages via Bhashini AI (Hindi, Bengali, Tamil, Telugu, Marathi, English).

DPI-Powered Ingestion Parallel retrieval via RBI ULI, Sahamati Account Aggregator, Dharani/Bhulekh land records, and DISCOM utility signals.

Real-Time Scoring Instant calculation of a 100-point Borrower Readiness Index (BRI).

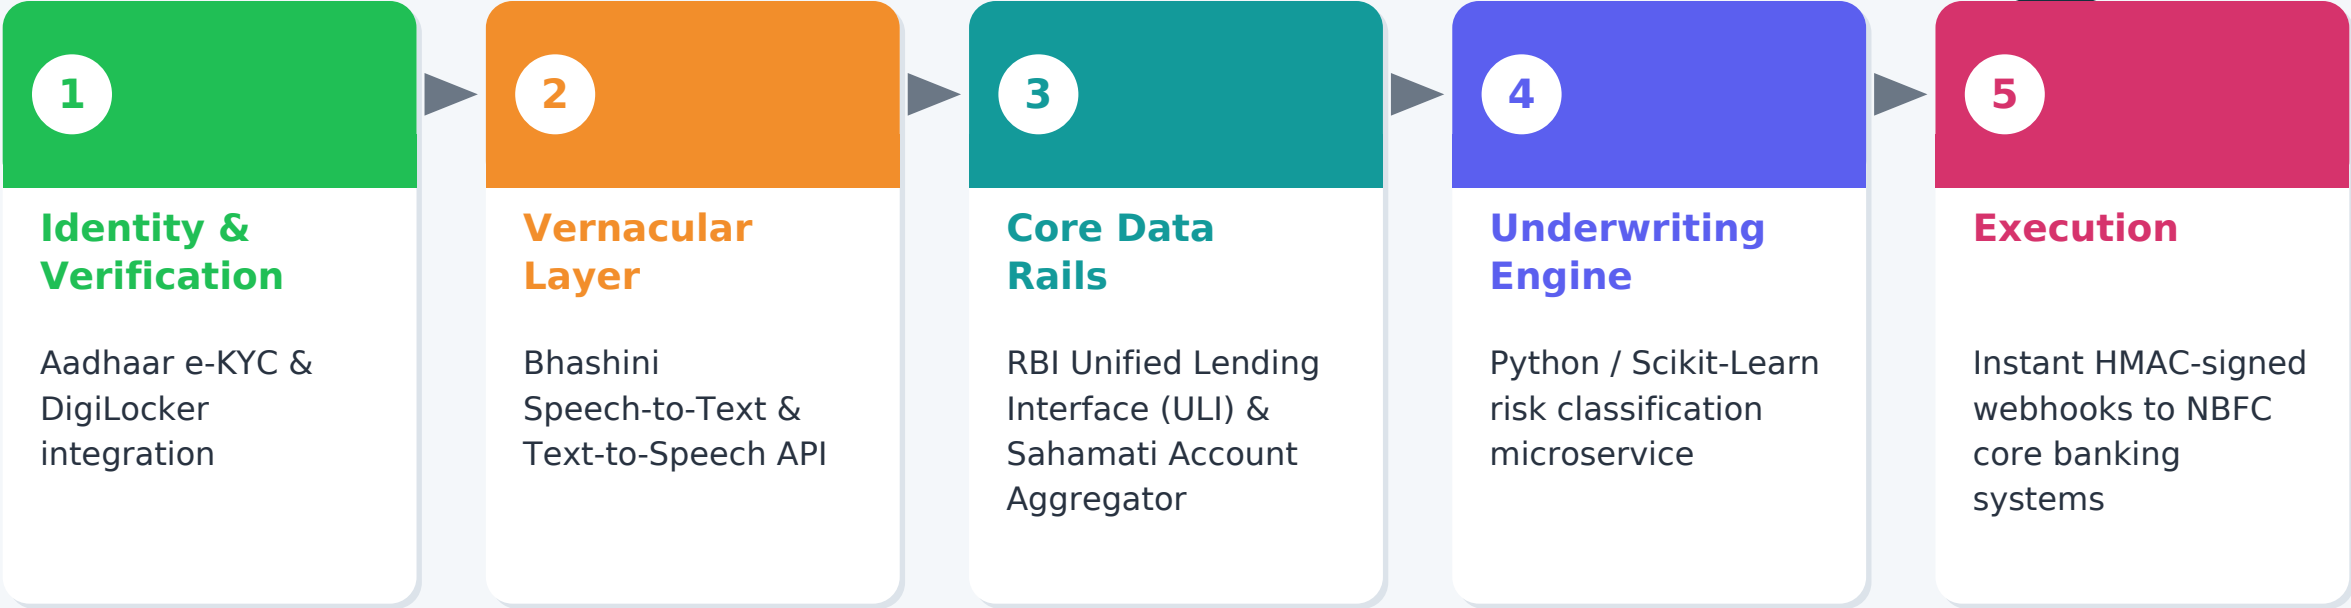

Pass-Through Privacy Zero borrower records persisted on servers; processing is strictly consent-driven and pass-through.

Zero-Touch Disbursal Instant lender decisioning and fund credit directly via UPI/IMPS.

4

The Technical Secret Sauce

How the Ecosystem Connects End-to-End

Consent > Data Ingestion > Scoring > Lender Decision > Instant UPI Disbursal

5

Unit Economics & Commercial Viability

Turning Low-Ticket Lending into a High-Margin Channel

CUSTOMER ACQUISITION COST (CAC)

< ₹50

per approved loan, slashed from ₹3,000+

TURNAROUND TIME

< 2 min

reduced from 3-4 weeks

INTEREST RATES

11%-14%

formal bank APR, down from 36%+ informal rates

REVENUE MODEL (B2B2C)

0.75%-1.5%

origination fee charged to lenders (free for borrowers)

Free for borrowers. Lenders pay only for approved, originated loans.

6

Target Market & Scaled Impact

Empowering Rural Supply Chains

140M

smallholder farmers in the addressable market

63M

micro-enterprises in the addressable market

Timely Liquidity Micro-loans for seasonal fertilizer procurement & inventory turnover.

Formal Identity Builds an auditable credit history for long-term financial growth.

NEXT STEPS

1

Complete sandbox validation

2

Pilot with 1 NBFC

3

Expand regional dialect support

**Just as UPI unlocked digital payments,
SetuCredit unlocks trusted credit data for Bharat.**
