

**SetuCredit**

VOICE-FIRST • DPI-POWERED

VOICE-FIRST • CONSENT-FIRST

# Your records are already a credit history.

Land ownership, electricity bills and bank activity say more than a bureau file ever could. SetuCredit turns them into an index a lender can act on.

✓ Consent first

✓ Data never stored

✓ 6 languages

Borrower phone → SetuCredit bridge → Partner NBFC → UPI / IMPS

**Start onboarding • Takes about 2 minutes**

Keep your Aadhaar-linked phone handy • Hindi Bengali Tamil Telugu Marathi English

Middleware orchestration over India's DPI • Bhashini • DigiLocker • Sahamati AA • RBI ULI

Consent first • Pass-through by default • Data never stored

## How it works — four steps, one bridge

Guided in your language, by voice or text

**2 MIN**

approx. journey

**1**

### Speak or type

Six Indian languages, one step at a time.

**2**

### Verify once with OTP

6-digit code to your Aadhaar-linked mobile.

**3**

### Consent — then only then

Tick exactly what you share. Time-bound.

**4**

### Get your Readiness Index

Parallel pull → BRI 0–100 → lender handoff.

Live app screens (PWA — 3G/4G friendly, low storage)

### Aadhaar verification — we never ask for your 12-digit number.

OTP proves possession of your Aadhaar-linked mobile. DigiLocker eKYC accepted where offered. Nothing is stored.

No bureau file? No problem. Your everyday records speak for you.

## Your score — the Borrower Readiness Index

Explainable, consented, handed to the lender

0–100

72

/ 100 • GOOD

STRONG 80+

GOOD 60+

FAIR 40+

BUILDING <40

Bands help the partner NBFC decide in minutes — the lending decision stays with them.

### Four consented sources, pulled in parallel

#### Land registry

Dharani / Bhulekh • ownership

PULLED ✓

#### Electricity bills

State DISCOMs • repayment discipline

PULLED ✓

#### Bank summary

Sahamati AA • cash-flow activity

PULLED ✓

#### Lending history

RBI ULI • past borrowing

PULLED ✓

### Pass-through by design — record contents are never stored.

- Consent gate enforced in code (HTTP 403 without valid consent).
- Features computed in memory; Postgres keeps audit metadata only.
- Every pull logged: source, time, count, consent ID — never payloads.

DPDP: explicit, time-bound, revocable consent. Revocation aborts in-flight pulls.
