

SetuCredit

Borrower Step-by-Step Guide

From language selection to loan readiness in about two minutes.

Available in Hindi, Bengali, Tamil, Telugu, Marathi and English.

Consent first - Pass-through by default - Data never stored

Step 0 - Before you begin

You need: (1) your Aadhaar-linked mobile phone switched on, (2) about two minutes, (3) this web app opened in Chrome or Edge. Voice guidance speaks each step aloud in your chosen language - keep the volume up.

TIP: Nothing is stored. Your records are read once, with your permission, and processed in memory only.

Step 1 - Choose your language and start

Pick your language from the dropdown (default is Hindi) and tap 'Start onboarding'. The whole app - buttons, instructions and voice prompts - switches to that language immediately.

The screenshot displays the SetuCredit web application interface. At the top, the SetuCredit logo is on the left, and links for 'How it works' and 'Trust' are on the right. A progress bar with five steps is shown: 1. Language, 2. OTP, 3. Consent, 4. Appraise, and 5. Result. The main heading reads 'VOICE-FIRST • DPI-POWERED' followed by 'Your records are already a credit history.' Below this, a paragraph explains that land ownership, electricity bills, and bank activity are used to create a Borrower Readiness Index. Three buttons are present: 'Consent first', 'Data never stored', and '6 languages'. The 'Get started' section includes a language dropdown menu set to 'English' and a prominent 'Start onboarding' button. A note states, 'Takes about two minutes. Keep your Aadhaar-linked phone handy.' On the right, the 'HOW IT WORKS' section outlines four steps: 'Speak or type in your language', 'Verify once with an OTP', 'Consent, then and only then', and 'Get your Borrower Readiness Index'. A final note at the bottom states, 'Pass-through by design — borrower records are never written to our database.'

1 Language 2 OTP 3 Consent 4 Appraise 5 Result

VOICE-FIRST • DPI-POWERED

Your records are already a credit history.

Land ownership, electricity bills and bank activity say more about a borrower than a bureau file ever could. SetuCredit turns them into a Borrower Readiness Index a partner lender can act on — with your consent, in your language, in minutes.

Consent first Data never stored 6 languages

Get started

Choose your language

Start onboarding

Takes about two minutes. Keep your Aadhaar-linked phone handy.

HOW IT WORKS

Four steps, one bridge to a lender

- Speak or type in your language**
Six Indian languages, guided one step at a time.
- Verify once with an OTP**
Sent to your Aadhaar-linked number and checked in seconds.
- Consent, then and only then**
Tick exactly what you share. Consent expires on its own.
- Get your Borrower Readiness Index**
Passed straight to a partner lender — funds arrive by UPI/IMPS.

Pass-through by design — borrower records are never written to our database.

Step 2 - Verify your number with OTP

A 6-digit OTP arrives on your Aadhaar-linked number. Type it into the box and tap 'Verify OTP'. The code proves this session belongs to you - nothing else is collected at this stage.

The image shows the SetuCredit app interface during the verification step. At the top, the SetuCredit logo is on the left and a 'Start over' link is on the right. A progress bar below the logo shows five steps: 1. Language, 2. OTP (current step), 3. Consent, 4. Appraise, and 5. Result. The main content area is divided into two panels. The left panel, titled 'Verify your number', instructs the user to enter the 6-digit OTP sent to their Aadhaar-linked number. It provides a 'Dev mode OTP: 390654' and a text input field containing '1 2 3 4 5 6'. Below the input field is a blue 'Verify OTP' button. The right panel, titled 'Why we verify', features a shield icon and a 'GOOD TO KNOW' section. It lists three points: 'The OTP goes only to your Aadhaar-linked number.', 'It proves the session is yours — nothing else is collected.', and 'Wrong number? Go back and start a fresh session.' A link at the bottom of this panel states 'Pass-through by design — record contents are never stored.' At the bottom of the app, a footer contains the SetuCredit logo, the tagline 'The middleware bridge between consented data and lenders.', and the privacy policy 'Consent first · Pass-through by default · Data never stored'.

Verify your number

Enter the 6-digit OTP sent to your Aadhaar-linked number.

Dev mode OTP: 390654

1 2 3 4 5 6

Verify OTP

GOOD TO KNOW

Why we verify

- ✓ The OTP goes only to your Aadhaar-linked number.
- ✓ It proves the session is yours — nothing else is collected.
- ✓ Wrong number? Go back and start a fresh session.

[Pass-through by design — record contents are never stored.](#)

SetuCredit The middleware bridge between consented data and lenders. Consent first · Pass-through by default · Data never stored

TIP: No SMS? Wait 60 seconds, check signal, then go back and start a fresh session.

Step 3 - Grant consent - you hold the pen

Tick **ONLY** the records you are comfortable sharing: land registry, electricity bills, bank summary, lending history (RBI ULI). Tap 'Grant consent'. Consent is time-bound and revocable under DPDP, and every pull is audit-logged.

 SetuCredit

The middleware bridge between consented data and lenders.

Consent first · Pass-through by default · Data never stored

Step 4 - Check your readiness

Review the records you agreed to share, then tap 'Check my readiness'. SetuCredit pulls the four sources in parallel and computes your Borrower Readiness Index (BRI) - usually in seconds.

✓ Lending history (RBI ULI)

Check my readiness

GOOD TO KNOW
Four sources, one pass

- ✓ Land, electricity, bank and lending records are pulled in parallel.
- ✓ Features are computed in memory and never written to disk.
- ✓ Your score is handed to the partner lender as a signed package.

 Pass-through by design — record contents are never stored.

 SetuCredit

The middleware bridge between consented data and lenders.

Consent first · Pass-through by default · Data never stored

Step 5 - Read your result

Your BRI score (0-100), suggested loan range, per-source breakdown and lender handoff status appear. A signed package goes to the partner lender; after their approval, funds arrive via UPI/IMPS. Use 'Print / Save as PDF' to keep a copy.

	Strong 80+	Eligible for larger loan amounts
	Good 60+	Likely to qualify with most lenders
	Fair 40+	Smaller loans; on-time bills improve it
	Building <40	Build bill/repayment history, retry later

Detailed analysis

● LAND REGISTRY

- 1.35 acres of land holding
- Ownership records clear
- Held for 3 years

● ELECTRICITY UTILITY

- 65% of bills paid on time
- 20 months of bills paid
- ~₹1425 average monthly bill

● BANK ACCOUNT (ACCOUNT AGGREGATOR)

- ~₹36719 average balance
- 98% income inflow consistency
- Banking for 45 months
- 39% of inflow committed to EMIs

● LENDING HISTORY (RBI ULI)

- 0 existing loans
- 21 months of regular repayment
- 2 late payments in the last 12 months

Next steps

Your pre-underwritten package (034b3e0b) has been shared with the partner lender. After their approval, funds disburse instantly via UPI/IMPS.

This assessment used the records you consented to share. They were processed in memory for this request only — nothing was stored on our servers.

New session

Step Help - Troubleshooting

OTP too short / Verify greyed out: the code must be exactly 6 digits.

Grant button greyed out: tick at least one consent checkbox.

Something failed mid-way: tap 'Start over' for a fresh session - each session is independent and old ones expire automatically.

Voice silent: unmute the browser tab and confirm a voice for your language is installed (browser language settings). The text on screen always matches what is spoken.

Wrong language: tap 'Start over' and re-select - language applies instantly.

Step Privacy - Your data, your rights

SetuCredit never writes your records to its database - only audit metadata, consent records and the score outcome are kept. Consent expires on its own and every data pull is logged without record contents.
